Diabetic Complications

糖尿病併發症

It is important to achieve good glycemic control in diabetes as persistently elevated blood glucose is damaging to tissues in our body. The eyes, kidneys and nerves are especially susceptible to diabetes, and in severe cases can lead to blindness, renal failure and amputation.

Because early diabetic complications are usually asymptomatic, regular screening for early detection and management of diabetic retinopathy, neuropathy and nephropathy is now a standard part of diabetes management.

持續過高的血糖會導致身體組織糖化，影響機能。因此良好的血糖控制對糖尿病患者非常重要。最受糖尿病影響的器官包括眼睛（尤其是視網膜）、腎臟（尤其是腎小球）及神經線（尤其是腳部），嚴重情況下可能導致失明、腎衰竭及截肢，因此不容忽視。

早期的糖尿病併發症一般也沒有徵狀，所以定期的糖尿病併發症篩查成為了糖尿病基本護理的一部分。
