

切勿輕視XBB變異株來襲！

Do not underestimate the threat of XBB variants!

XBB及其亞系變異株是**目前最廣泛流行的變異株**，佔本港感染個案約90%^{1*}。 *資料截止2023年12月22日

XBB and its sub-lineages are currently the most **dominant circulating strains**, which account for 90% of all characterised specimens found in Hong Kong cases^{1*}. *Updated as of 22 Dec 2023

有外國研究指出，若同時感染流感和新冠，患者的死亡率可能較僅感染新冠病毒的患者**高出一倍以上**^{2!}

Overseas studies show that individuals infected with both COVID-19 and flu may face **twice the odds of death** compared to those with COVID-19 alone².

最新版本
XBB疫苗

更有效針對XBB變異株

The latest XBB vaccines offer **enhanced protection** against the circulating XBB variants³

不同類型
新冠疫苗

混打或激發較好免疫反應

Research suggests that mixing different vaccine types or products may potentially **provide better immune protection** than using the same product⁴
