

# 兒童近視

## Children Myopia Control Plan

### 控制近視加深防眼疾

Keep myopia under control to prevent eye diseases

深度近視會較大機會引致各種併發症，如白內障、視網膜脫落等，情況嚴重更可能導致失明！所以從小開始控制近視加深是很重要的！

High myopia is prone to complications such as cataract and retinal detachment, which may lead to total loss of vision. As such, it is very important to keep myopia under control since childhood.

## 港怡醫院“兒童近視控制計劃”

### Gleneagles Children Myopia Care Plan

參加所有療程前，需先由醫生診症及根據病人情況而建議是否適合此計劃。

The suitability for the Myopia Care Plan is subject to doctor's advice and individual patient's conditions.
